Objective

- Passionate fourth year Computer Science and Engineering student interested in internship roles where I can further explore UI/UX design, frontend development and software engineering.

Education

Bachelor's in Computer Science and Engineering - GPA 3.71/4.00, Expected Grad. 06/2027
University of Puerto Rico - Mayagüez Campus

- **Relevant coursework:** *Data Structures, Analysis and Design of Algorithms, Introduction to Software Design, Computer Architecture II, Operating Systems, Databases, Computer Networks, Human-Computer Interaction (current)*

Google Tech Exchange, Student

01/2025 – 05/2025

- Semester long virtual program dedicated to enhance student's technical and professional skills with focus on the use of artificial intelligence
- **Coursework:** *Algorithm and Systems Design, Intro to Software Design, Careers in Tech*

Skills

Programming Languages:

Python, C++, Java, HTML/CSS, C, JavaScript, SQL

Bilingual

Fluent in Spanish and English

Artistic Design Softwares:

Canva, Adobe Photoshop, Figma

Tools:

VSCode, Git, Github, Eclipse, AutoCAD, WireShark, Linux, Google Cloud, BigQuery, Docker

Experience

CodePath Tech Exchange - Remote, Tech Fellow

01/2026 – Present

- Supported instruction for an **Algorithms & System Design** course, assisting students with data structures, algorithms, and Big-O analysis.
- Led small group sessions and 1:1 support to reinforce problem-solving strategies and optimize solutions.
- Reviewed and debugged student code, providing feedback on correctness, efficiency, and clarity.

Projects

Creative Portfolio Website 🌐, <https://portfolio-vivi.vercel.app/>

- Designed and developed a personal portfolio using **React** to showcase original artwork across multiple mediums.
- Built interactive UI elements including hover states, modals, and responsive layouts.
- Styled the site using **Tailwind CSS** to create a clean, modern look.

RUMAD 2.0 - University Courses Management System Web App, *(Databases CIIC-4060)*

- Built a full **ETL pipeline** to clean, transform, and load raw academic data into **PostgreSQL**.
- Developed a Flask-based **REST API** using the MVC pattern, implementing secure CRUD endpoints, validation logic, and routes.
- Created a **Streamlit frontend** with user login and real-time course statistics visualizations connected to a deployed Heroku backend.

Fitness Tracker Web App, *Tech-X Intro to Software Design*

- Built and deployed a **Streamlit app** integrating fitness data, community posts, and AI-generated wellness insights using **Vertex AI**.
- Developed **Python** modules connecting to **BigQuery** for real-time dashboards and goal tracking.
- Managed feature implementation and versioned releases, deploying updates through **GitHub Projects** and **Cloud Run**.

Organizations

Huella Deportiva, *Graphic Design Team Subdirector*

09/2024 – present

- designed real-time graphics using **Adobe Photoshop** for live sports events and matches
- Trained and mentored new members, providing guidance on design techniques and software tools.

CAHSI Allyship Program, *Ally, former Protégé*

01/2024 – present

- Provided mentorship by pairing with protégés from fundamental computing courses
- Participated in monthly professional development meetings, led by **CAHSI** faculty and staff, to foster skills in inclusion and diversity within the tech community

Pink Pandas UPRM Women In Cybersecurity, *Media Manager, Founding Member*

04/2023 – present

- Managed and maintained the association's social medias, ensuring up-to-date information and a user-friendly experience using **Canva**
